

BAHRIAH BT KAMARDI SUHAILI, Software Engineer
+60127739521, bahriahkamardi@gmail.com

Summary

Dedicated and enthusiastic undergraduate software engineering student with 3 years of academic experience in designing, developing, and testing software solutions. Eager to learn knowledge in real-world settings through real works, contributing to innovative software solutions while further honing technical skills.

Education

Bachelor of Software Engineering with Honours, Universiti Malaysia Sarawak (UNIMAS)

Oct 2022 – July 2026

CGPA : 3.49

Foundation in Science, Universiti Teknologi MARA (UITM Dengkil)

CGPA : 3.44

MUET : Band 4

Sijil Pelajaran Malaysia (SPM) 2020

RESULT : 6A 3B

Skills

Programming Languages:

Experience in : C++, C, Java, HTML 5, CSS, JavaScript, Dart, SQL, Python, FastAPI
Frameworks Experience: React Native, Laravel

Integrated Development Environments (IDEs):

Webstorm, Visual Studio Code, Dev C++, Oracle Java, Android Studio, Github

Others:

OBS Studio, Figma, Canva

Participation

Medical AI Chatbot Mobile Application Developer – Final Year's Project

September 2025– June 2026

Develop Frontend for mobile application using React Native Expo.

Develop Backend using FastAPI, Python, and RESTFUL API for language and symptom paramater

Gained knowledge by deploying backend server using Gcloud and Render

Preprocessing Dataset JSON format for dataset for symptom matching-retrieval

Integration of Gemini AI API for reasoning and firebase for database storage

Internship Software Developer – Cat Tech Enterprise

March– September 2025

Gained practical knowledge by developing Frontend for mobile application using React Native Expo.

Assists with IOT hardware troubleshooting consists of Rasberry Pi ,ESP8266 and others.

Assists in debugging web application using Laravel Framework.

Mobile AI Workshop Sarawak Skills

July – September 2024

Participated in a hands-on Mobile AI workshop focused on building AI-powered mobile applications using Android Studio and Kotlin. Gained practical experience in integrating AI/ML models into Android apps and developing intuitive user interfaces (UI) following Material Design guidelines.

Project Leader for YourTailors' website and mobile application(Dart) for the third year's course's final project.
